

# StoryFlow

Tracking the Evolution of Stories

Sorin Adrian Robert Davidoi  
Andreea Muscalagiu

# Star Wars - previous visualization

# Star Wars - current overview

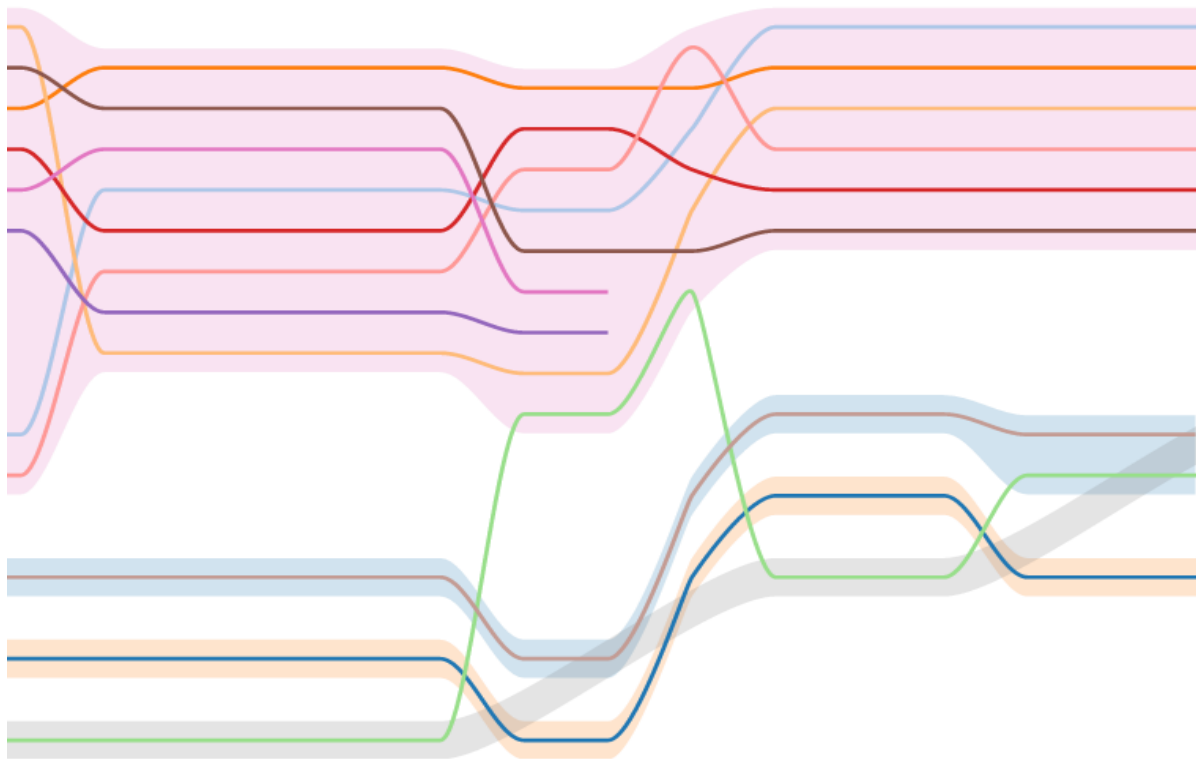

# Star Wars - current visualization

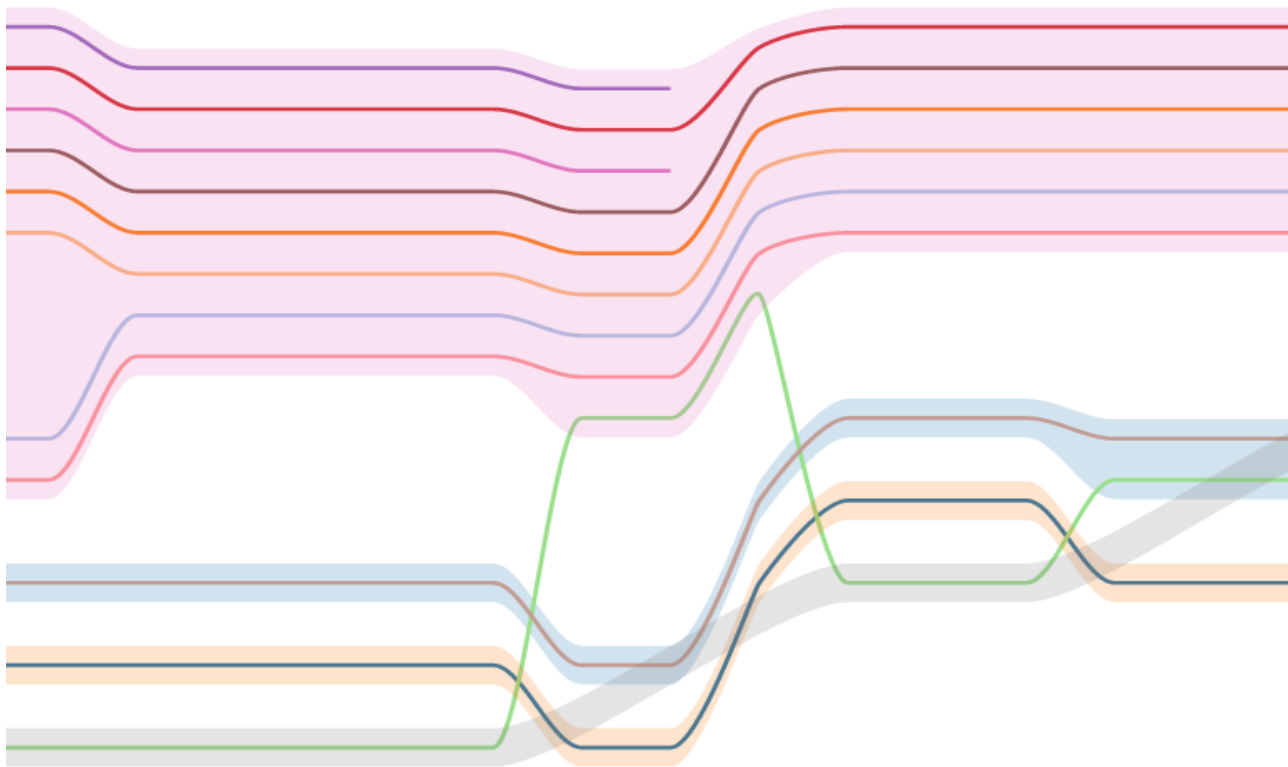

# Current Approach

- ordering algorithm for locations, sessions and characters
- highlight selected characters
- visualize locations
- animated transitions between data sets

# Star Wars - 3 iterations

# Star Wars - 300 iterations

# Interactivity

- highlight character: transition which changes stroke width and opacity
- animated transition: basic d3 transition

# Analyzing our project

## Advantages

- good initial layout
- highlight character

## Disadvantages

- incomplete algorithm
- dubious positioning of location names
